

ALEXANDRIA, VA.

TUESDAY, NOVEMBER 29, 1870.

EUROPEAN AFFAIRS. - Saturday and Sunday were days of severe fighting in France. Along the front of the opposing armies north bia, with their attaches and secretaries, were of the Loire and south of Paris, extending also present. from Montargis on the east to Dreux on the west, a distance of one hundred miles, there was a contest between the armies of Prince Frederick Charles and General De Palladines. The first dispatches from Tours state that in the general engagement the French were viotorious at every point; and that the Germans were routed and retreating. A subsequent dispatch from London says that on Sunday, the Tenth Prusssian and Twentieth French Corps fought a battle a few miles north of Orleans, in which the French were defeated and driven from their entrenchments. In this battle a French General was taken prisoner by the enemy. In the north of France a battle occurred near Amiens, eighty miles north of Paris, which the first dispatches from Tours said was a German victory. Later dispatches days ago, by a mob, to break into the jail there, from London contradict this, and report that where two men charged with murder were conthe French completely defeated the Germans, inflicting severe losses. In the southeast of France, Garibaldi's army was attacked on Saturday on the eastern side of the Vosges Mountains a short distance from Dijon, and

A letter from Harper's Ferry to the Washinton Republican, dated on Saturday, says "The case of the Baltimore and Ohio Railroad vs. The Harper's Ferry Water Power and Manufacturing Company was called in the Court here yesterday morning at ten o'clock Judge Hull presiding. Gen. N. P. Banks and Andrew Hunter, appeared for the Water Power Company, and Judge Lee, J. B. H. Latrobe, of Baltimore, and Mr. Blackburn, of this place, for the Railroad Company. Judge Lee made the preliminary opening, and closed with a motion for an order to have a more full and complete survey made of the property, in order to obtain the exact northern limit of the land purchased by George Washington of one Harper, and on which the Government of the U. S. afterwards built an arsenal &c." This motion was argued all day.

The report of the Department of Internal Revenue, prepared by the late Commissioner and present Secretary of the Interior, Mr. Columbus Delano, opposes any change of the tax on spirits, believing that it would be more to the benefit of speculators than to the treasury of the country. It recommends making the taxes on all descriptions of tobacco, uniform, and shows that there must be some improvements made in the bonded warehouse system to render it efficient and reliable. A portion of the report is an exposition of the blunders of the Tax bill, which was rushed through Congress during the closing days of the session, in July last.

Secretary Boutwell delivered an address yesterday in Washington, at a Charity Fair, held for founding an institution designed to furnish an opportunity for labor to those who dwell in the city, but whose indigence is so great that they have not the means of obtaining or doing work. He argued that no complete remedy can be found for poverty, but unquestionably the nearest approach to it is in a system of which looks like that of a palace sleeping car public instruction supported by universal taxation, and supported also by a public sontiment means for the education of the whole people, and their preservation from poverty and vice.

The latest dispatches from Europe affirm what was reported in the telegraphic dispatches published yesterday, that it has been agreed upon that the demands of Russia shall be re ferred to a Conference of the Powers interested in the Treaty of 1856, England, France, Turkey, Austria, Italy and Russia being the contracting parties to that document. Ministers representing these Governments will meet in London in January next, and by this arrangement, war, for the present at least, seems to be

Alarmed at the rebukes which have been administered recently to the President, the Radical papers are now asserting that he, the President, has not and will not interfere in the Senatorial election in New Jersey. Any body, who is a Radical, it is asserted, "will be satisfactory to the President!"

In Baltimore an association has been formed auxiliary to an English Association, for the purpose of raising funds for the relief of suffering non combtants in the present war in Europe; the funds to be disbursed by the English So-

Late advices from Mexico represent the country as in a disturbed condition, and disorders prevailing every where. Conspiracies, muticies, &c., prevail. Confusion is said to be "the order of the day."

THE PENNSYLVANIA COAL TRADE. - The anthracite coal trade continues steady, and the production quite large. The Philadelphia Ledger says :- "The coal year of the Reading railroad ends with the current month, and conwas interrupted in the Schuylkill region during the current year, its business is much larger than could reasonably have been expected; inarread suring, it is reported, a 5 per ct. dividend at the approaching semi annual period. The en tire coal production for the year will be larger than was estimated, and will very considerably exceed that of any previous year. A number of mines in the Schuylkill region have stopped work, and others are being worked with reduced forces. The same is also true of the Shamokin region. The retail price of Schuykill coal in this city is complained of as high. We saw in this city is complained of as high. We saw a bill on Saturday for Schuylkill stove coal, in which the price charged was \$7.50 per ton. This, with coal selfing at the mines at \$2.50 manipulation of the coal in the market here, should not, in reason, double the cost of mining and preparation at the mines."

In this city is complained of as high. We saw dressed temales" went up to a man and coolly obbed him of a man and coolly obbed him of his watch. He was too gallant rosist, but followed them into a house and demanded restitution of his property. He did demanded restitution of his companion, and then, turning to our of his companion, and then, turning to our firend, said: "No use to ask what you take—should not, in reason, double the cost of mining and preparation at the mines."

In this city is complained of as high. We saw does all the was too gallant rosist, but followed them into a house and pairfax streets. He could not say. He was too gallant rosist, but followed them into a house and for sale by on condition that he was not to be asked to some the wants of his companion, and then, turning to our firend, said: "No use to ask what you take—should not, in reason, double the cost of mining and preparation at the mines."

In this city is complained of as high. He was too gallant to one, observer, to show the old man to one, on condition that he was not to be asked to be asked to be a store and for sale by complete. The count of the wants of the wants of his companion, and then, turning to our firend and Currants received this bear department. The barkeper attended to the wants of his companion, and then, turning to our firend and Prince streets, formerly to be a current of the wants of his companion. The barkeper attended to the wants of his companion. A store and for sale by corner Prince and Pairfax attents.

A CHOICE lot of Gre

NEWS OF THE DAY.

"To show the very age and body of the Times."

Judge McCunn, in New York, on Saturday, released Col. Louis E. Granger, who was lately arrested, at the instance of Governor War mouth, of Louisiana, on a charge of altering bis pay rolls as Assistant Adjutant General, and forging Gen. Longstreet's signature to them. Yesterday A. S. Badger, Chief of the New Orleans Police, arrived in New York, with a requisition, and declares he will cause his re-arrest, it he can be found. Granger, when arrested, was on his way to Boston. to York on hearing of his arrest, and was marrried to him on Saturday, after his release.

The marriage of Senor Roberts, minister from Spain to the U. S., to Miss Angela Ter- | will accept. ry, a Cuban lady residing in New York, took place yesterday at St. Stephen's (Catholic) Church. The church was densely crowded with Spanish and Cuban residents. The Austrian, Prussian and Italian ministers, and charges d'affaires from Portugal, Turkey and Colom-

The result of the recent Government survey between Nevada and Utah locates several important mining districts heretofore conceded to be in Nevada in Ucah, among which are the Pioche, Shoshone and Smoky Valley. These, at the late election in Nevada, gave Democratic majorities. The discovery will probably cause the return of Fitch to Congress. The Democrats, however, still elect most of their

Bishop Potter, of New York, has imitated the example of Bishop Littlejohn, of Long Island, in relation to the new order of English Ritualists, whose members have attempted to officiate in the diocese. The bishop has prohibited any priest or missionary of the organization from performing ministerial acts as elergymen of the Episcopal Church in his see.

An attempt was made in Potsia, Mo., a few fined, so as to take the prisoners out and lynch them. The Sheriff resisted the mob, and being compelled, ordered his posse to fire into the mob. One was killed and the rest dispersed.

Schooner Clara T. Friend, of Gloncester, captured by the British steamer Plover about seven weeks ago, was rescued from the custody of the Provincial Government on the 24th. On the 25th the steamer Plover recaptured her, and the Captain and four others are now held as prisoners.

A Washington dispatch says that the work of consolidating the internal revenue districts throughout the country has thus far resulted in dispensing with over four hundred Assistant Assessors, and it is thought that at least two hundred more will be dismissed by the close of the year.

One feature of the siege of Paris, which presents a curious study for the philosopher and the physiologist, is the question of the food supply, whereby 2,000,000 of people, without communication with the world outside, have so long managed to subsist without serious discomfort. The election in the Raleigh district of N. C..

on Saturday, to fill the vacancy in the Fortyfirst Congress passed off quietly. The indication by Congress to define their duties. Gen.

Pope states at length the condition of Indian affairs in the West. Capt. Charles B. Phillips, of the Engineer Corps, on duty in Missouri, has been ordered to report to Major Craighill at Baltimore, the Superintendent of the improvements in the channel of the Chesapeake Bay and the Poto-

Hotheimer Brothers, whiskey manufacturers and dealers, in Cincinnati, suspended payment yesterday. Their liabilities are \$500,000, and assets \$650,000. They ask an extension, and think that they can pay the debt.

In Alabama the political difficulty has locked the wheels of Government. The military have been collected around the State House.

PNEUMATIC PASSENGER CARS. -A pleasure trip on a new line of pneumatic cars was taken by seventy invited guests in Chicago on Saturday last. The pneumotic car was found backed up to a portable engine at the rear of the depot. The car resembles an ordinary street car, excepting the peculiar formation of the roof, and on this account it was at once dubbed "the palace street car" by the visitors. This heavy top renders the car about twice as heavy which recognizes such a system as the only as others, and is of great importance to the pneumatic ear, for it contains the propelling power. It consists of four hollow tanks, made of copper, braised together, and of sufficient capacity to hold 150 cubic feet of compressed air, and of sufficient strength to resist a pres sure of 250 pounds to the square inch. These tanks are filled, or charged, by means of an air force pump worked by the steam engine. Beneath the seats, on either side, at one end of the car are two small machines operated precisely the same as the ordinary steam engine, conpected with the wheels by cranks. -The engines are controlled by the conductor on the platform by means of a wheel placed in juztaposition with the brake.

"After the filling of the tanks, which occupied but a few minutes, the company was divided into two parties to accommodate the size of the car. The first load consisted of thirty men. The car started with about the same celerity as one would drawn by a pair of horses, and bowled along very nicely at the rate of six miles an hour. The pressure on the gauge at starting was 135 pounds. After passing up the track for a mile the car returned, making the last mile in a few seconds less than ten minutes, and the gauge indicated that only 30 pounds of pressure had been used. The car was reloaded, and went another mile and one quarter, when the pressure became exhausted. The tanks were only calculated to hold sufficient air to propel the car three miles, and it was so stated by Mr. Myers be fore the start was made. The trial was pronounced to be entirely satisfactory by the railroad men present.

FAILURES IN NEW YORK. - The failure of a German cloth house and the Northern Transportation Company were announced yesterday. The liabilities of the latter are about \$400,000, of which \$200,000 are due to banks in Ogdens burg, Detroit, Toledo, and a small amount to this city. The remainder is due for insurance, supplies, and interest. The assets of the company are estimated at \$1,200,000, chiefly in predisposed to insanity. If some such precaucanal boats, lake steamers, and other vessels, which cannot be realized on at this season exsidering how long and seriously coal production | cept at a great sacrifice. The company ask an extension of one, two, and three years, with bonds to secure the amount of the extension. It is probable that the creditors will grant the extension of time asked .- N. Y. Post.

FEMALE ROBBERS.-Female footpads are

VIRGINIA NEWS.

A serious affair has recently occurred in Roanoke county. A colored man ruined and ran off with a white girl-the brother of the girl with his friends went in pursuit, and upon approaching the house where they supposed the man and girl were hid, they were fired upon by a party of colored persons; seven of them were wounded; they returned the fire and wounded two of the colored people. Some older citizens interfered and prevented further disturdances.

The Faculty of Washington College have invited Mr. James P. Holcombe to pronounce marry a Miss Thorndyke, who came to New on the 19th of January a eulogy on Gen. Lac. They have also invited Jefferson Davis to pronounce a eulogy at the next commencement. It is understood that both of these gentlemen

WASHINGTON COLLEGE, LEXINGTON, VA .-A correspondent of the Richmond Dispatch writes from Lexington: -"Mr. Edward Valen tine, the talented young artist, has been here for several days, holding a very satisfactory conference with the executive committee of our Lee Memorial Association, and the family of Gen. Lee, whose wishes the committee propose to follow implicitly. As the result of the freest interchange of views. Mr. Valentine has been instructed to go forward at once and prepare his model of a sarcophagus, with a recumbent figure of the great chieftain. The admirable bust which he secured last summer is to copied as a model for the figure, the details of the design being left to Mr. Valentine's known

Mr. Valentine has also during this visit taken an artist's view of "Traveller," the old war horse of Gen. Lee. He has seen him in different attitudes, and taken accurate measurement of his limbs, &c.

There has just arrived at the Institute a bronze equestrian statuette of Gen. Lee, by the great artist Volck, of Berlin. It is presented to the Art Gallery of the Institute by

ACCIDENTS .- One of those accidents which might be common in the streets of New York, but which, by some chance, are of rare occurrence, viz : the running over of a pedestrian by a steam fire engine, has occurred in that city under peculiarly painful circumstances. An elderly gentleman, while crossing Broadway, near John street, a few evenings ago, was run over and instantly killed by a passing engine, which was being driven up Broadway at the usual reckless speed which chracterizes the drivers of these "cars of Juggernaut." Now accounts he was lying upon the cold marble slab at the Morgue, curiously scrutinized by listless observers, and attached to him two mysteries-the tremendous and inscrutable mystery of death, and the other mystery of his mortal identity. As is usual in such cases, the driver of the engine will probably go sect-Irea. - Wash. Patriot.

METROPOLITAN CHURCHES .- A correspon dent of the Standard of the Cross, the organ of the Protestant Episcopal Church of Ohio, notes the fact that the recent Convention o the Unitarian Church, held at New York, took

city. He says: "The Episcopai Church ought not to be be hind. Measures ought to be taken immediately for creeting at the capital of the Republie a Metropolitan Church, which would be for that city what St. Paul's is for London. The work can easily be accomplished if the Church can be induced to take hold of the matter in earnest. I hope that the clergy and laity of the city of Washington will at once take the proper steps for bringing this subject to the attention of our people throughout the Union.'

VALUABLE FARM AND FISHERY .- That valuable estate in Princess Aune county known as Bayville, the homestead of the late James S. Garrison, is to be sold to morrow. This property is located ten miles from the city of Norfolk, immediately on Lynnhaven river and Chesapeake bay, having an "ocean view" of great beauty; it contains 7961 acres and many oyster coves containing at this time over 5,000 bushels of natural growth oysters, and capable of nourishing 100,000 bushels, with a splendid and superior new fishery. Linkhorn farm, adjoining, contains 75 acres, with two fisheries, the best on the coast. Bayville is well known all over the United States. During the lifetime of its owner it was the centre of attraction for old Virginia hospitality, and was the resort of many of the greatest dignitaries of the country. Its owner had a heart as big as all out of doors, and every latchstring was on the outside. Such was Bayville of old.

ENGLAND AND THE SUEZ CANAL.—There is rumor that the British government is negoti ating for a transfer of the rights and privileges of the Suez canal to itself. The prestration of French resources is alleged to have driven M. Lesseps to England for funds to pay himself and to keep the great enterprise going. As an investment, the canal does not pay, but it is of great value to commerce, especially the commercial interests of England, which require it to be kept open and in order. France is no longer in a situation to carry out the object, and unless England backs it, this great work of science will probably prove a failure. Should this be the result, it will be a monument at once of the creative and destructive energies of man, of his capacity of building up with one hand and pulling down with another, not sur passed by any of the similar illustrations of that collection of contradictions, human nature, which the present war will leave in its wake in Europe. - Baltimore Sun.

INSANITY AND MURDER. - No one doubts that the strain upon the mind, occasioned by the fast succeeding sensations of the day, is too much for average intellects, and that insanity from that cause has alarmingly increased of late. As lunatics, apparently harmless, are permitted to go at large until they have been guilty of some terrible deed that first attracts attention to their mental condition, it would not be unreasonable to suggest the propriety of the relatives of odd or occentric persons placing them under medical surveillance, and of means to confine them being employed the instant they manifest any evidence of an aggravation of their mental maiady. This suggestion is prompted by the recent great increase of bloody crimes committed by persons tion as that pointed out be not taken murders by lunatics will be of daily occurrence.-Phila.

City Item. of our city, who has a sweetheart in the coun. Mr. Schenck has been the master spirit in intry, was delighted a few days since to welcome her father at his place of business. By way of impressing a due sense of his importance upon among the revivals of the day. In former his future father in law, he "showed him times women have been known to take to the around," and during the walk the old gentleroad, but they generally kept clear of great man becoming "dry," desired information as cities. Now, however, they seem to be among to the best place to get a toddy. The young the ground the Black Sea be to the best place to get a toddy. The young the commonest features of New York life. In man innocently answered that he had heard it made an exception? - Wash. Patriot. Thirty-fifth street, the other night, two "well-dressed females" went up to a man and coolly never indulged, himself, he could not say. He FOR RENT-The BRICK STOREHOUSE rever indulged, himself, he could not say.

AGRICULTURAL INTERESTS .- The Commissioner of Agriculture in his annual report expresses the gratification of representing as prosperous and productive in a high degree, the agricultural interest of the country. He eays it is gratifying to believe from evidence that the examples of rational and recuperative culture are relatively increasing, however slowly, and gradually making inroads upon the destructive and irrational modes so generally prevalent. These examples are most numerous in the Middle States, and are seen with comparative Irequency in the older sections of the West, and are found occasionally in New England, and are beginning to be noted in the Southern States, but there is no State in which exhaustion and irrational culture is not predominant. Industrial colleges, under the land the soft tread of the snow flakes as they fell on grant of Congress of 1862, have progressed during the past year, but the land scrip has been issued to most of the Southern States, and a portion of it has been soid, but the Commis sioner has heard of no action toward the organization of coileges and fears the scrip has in in a few minutes, while this seems to promise some instances been frittered away by sales at nominal prices, as has been the case in many of the Northern and Eastern States. The condition. I heard one farmer adjoining Lees. Commissioner speaks of steam plowing, silk culture, chincona trees, statistical division, cat-

ble in the future. The number of packages of seeds issued during eleven months of the year number 358, 391. The distribution includes seeds of cereals grasses, hemp, jute, ramie, opium, poppy, sugar beet, tobacco, sorghum, forest and shade tress, and many of the species of plants oliginous, edible, medicinal and fibrous. The total amount expended by the Department since November 30, 1869, is \$169,175, including salaries, leaving a total balance unexpended of the appropriation for the current fiscal year of

St. John, New Brunswick. - Unious it is to be remarked how their sea-faring habits tinge the speech of the people of New Brunswick. Servant men and servant girls are said to "ship" when they hire for a month, or for six menths. A fine, stout lass will ring at your half door and inquire whether you want to "ship a girl:" and, when a young couple are engaged, they are said to be "shipped." A congregation will talk of "shipping" a new clergyman. The master of the house, whatever his calling, is invariably the "skipper. Even parsons are "skippers" of the church, and at their homes are inquired for under this familiar designation: The best society is call-ed "merchantable"—that being the term for that the old man is dead the question is to fish of the first quality; while the lowest straidentify him. Struck down in the heart of the tum is "scruff," or "dun." Flags are in unigreat city, he was unknown to all, and at last versal request. Every merchant has his flag at his storehouse or wharf; a vast number of private houses have each a flag staff, and on holidays or occasions of rejoicing the flags are hoisted. When the schoolmaster desires to indicate that the school hour is at hand, he elevates his flag-hanting it down "half mast" when but five minutes remain in order to quicken the steps of the loiterers. When, in other lands "holy bells would knott to church," the "beadle" here raises, on a staff in the churchyard, a standard, on which is emblazoned the mitre and the cross.

"MAMMY" IN OLD VIRGINIA .-- It used to an increased majority over the August elections.

Gen. Sherman desires that if the military are to be used in connection with the civil authorities, there should be some explicit acfor the babies; and the "mammy" herself, a costly bandana tied with a grace Eugenie herself could'nt surpass, a dignified carriage, and a general air of well being and self-respect that was delightful to contemplate. Often she had been the "mammy" for more than one generation, and in that case, truth compels us to say, was occasionally a little bit despotic. But what a loving despotism! Watch her as she casts an eye over the little flock. An acquaintance of the family goes by, and says in passing, "Ah! these must be Mrs--'s children." Could Mrs .- herself be more auxious than "Mammy" is that the children should appear well bred? No, indeed. At her bidding oach one performs some little act of courtesy taught by "Mammy," and is commanded or lectured, as the case may be, when the lady has passed on and they are alone again. And so, taking it leisurely, the evening walk comes to an end, and "Mammy" brings the little folks home safe and sound, and puts them nicely to hed.

Ab, happy babies, to have a good "Matomy!" -Lynchburg News.

MARTINSBURG AND POTOMAC R. R .- We learn, says the Berkley (West Virginia) Union from Mr. Faulkner, that his recent visit to Pennsylvania has been satisfactory and that the Pennsylvania Companies are acting in good faith in their co operation with our improvement. He expects to have the road under contract before Christmas, and much of the work done during this winter. He has no doubt the section from the river to Martinsburg will be completed by the close of next summer, and cars running to this place. It is the intention of the Northern Companies so soon as the road is completed to Martinsburg, in addition to the regular mail train, to have an express train, leaving Martinsburg every evening, with all the comforts of eleening cars and landing the passengers in New York or Philadelphia that night.

SHENANDOAH VALLEY ROAD.-The Roanoke (West Virginia) Times contains a correspondence from Giles county, from which we copy the following extract: "The extension of the Shenaudoah Valley Railroad throughout Southwest Virginia is the theme of special interest. The formation of the Valley between Brush and Gap Mountains renders it the most practical route for a railroad that can be found. The people are alive to the importance of the road, and are willing to lend any reasonable aid which may be asked. The right of way is certain. This route will take the Shenandoah Valley Road through Craig, Giles, Bland, Tazewell and Washington counties, missing Roanoke entirely."

DROUGHT .- It would appear from extracts given, as well as from other information received at the Smithsonian Institution, that the drought and high temperature of last summer extended almost, it not entirely, around the middle portion of the northern temperate zone. It does not follow from this, however, as many suppose, that the coming winter will be unusually cold, since it more fre quently happens than otherwise, that a very warm summer is followed by a mild winter.

MR. SCHENCK.-There appears to be no longer any doubt that a desperate effort will be made by the Protectionists to establish the claim of Mr. Schenck to a seat in the next Congress-thus ousting Mr. Campbell, his successful Democratic opponent. As Chair-FORGOT TO WINK .- A dashing young beau man of the Committee of Ways and Means, fluencing special legislation.

> THE BLACK SEA .- Some of the extreme Radicals are highly incensed at the attitude of England in opposing the freedom of the Black

Letter from Londoun County.

Correspondence of the Alexandria Gazette.] LEESBURG, Nov. 25 .- Our November Court closed on Wednesday night, after dispatching a good deal of civil business, and getting off the docket without trial some cases that would have created ill feeling in the community. I think there was no criminal business transacted, though I was too busy to be in the Court

House much of the term. We had a good and much needed rain on Tuesday, with a bracing clearing up. To-day the sun rose very bright, but in a few minutes disappeared under the clouds, and the rain commenced falling early in the day. After night it rained hard, and I retired to my den to read the newspapers, and was at last rominded by the solomn stillness that reigned around that something unusual was happening, and on going out the ground was found to be white, and the ground spake silently, but truly, that the winter was upon us. Nov. 26.—The snow west of Cotoctin Mountain is considerable; but it is all melting under a very brilliant sun.

It is twenty-six days later than the first snow of last season, but that was only a flurry, over

burg say that he had a field of 125 acres, that had yielded seven barrels (thirty-five bushels) tle disease, the library department, grounds, per acre, and another in the German settlement eaid his crop was forty bushels. The county authorities are repairing the turn

&c., making suggestions designed to be valuaikes above and below Leesburg, and I under stand are doing it thoroughly. The grading of the Leesburg and Aldie Turnpike has been completed by Messrs. O'Leary and Histe, of Rappahannock, in a style that is

the praise of all who travel it.

Mr. O'Leary is the best road maker I have ever known, and Mr. Hisle, young and a giant, has learned rapidly under the tuition of his elder partner. Now how the metaling is to be done is the question, as there remains of the subscription only about \$1,000. Possibly the townships of Leesburg and Mer

eer, with the help of the rich farmers along the road, will do that most needful thing.

COMMERCIAL.

ALEXANDRIA MARKET, Nov. 29.-The market for Wheat is quiet and steady; offerings of 1766 bushels red, with sales at 118, 120, 125, 127, 130, 132, 133, 125 and 137. Corn is dull and in light receipt; offerings of 50 bushels white and 293 of mixed, with sales of the former at 73, and of the latter at 72 and 78; sales of 64 bushels yellow at 75. Rye is nominal. Oats are steady; sales of 574 bushels at 43 and 45. Corn in the ear brought \$3 624 per bbl. Small offerings of Buckwheat, with sales at 110.

COLD WATER SELF-WASHING SOAP. The manufacturer having purchased the right to the city and county of Alexandria, would invite the attention of the public to this fine osp, which washes effectually from the coarsest to the finest fabric, in cold, warm, hard, soft or salt water, without boiling or machinethan any ordinary soap used.

It is a superior soap, for the following reasons, viz: 1st. The soap, by its own action, dissolves the grease and liberates the dirt in the garment; hence it quietly and speedily accomplishes that which is usually done by labor and violence upon the clothes by a washing machine or wash board. Very little hand rubbing is required when this soap is used, except when the dirt has settled very tightly in the garment, or it

has been very much soiled. 2d. One good wash woman, when familiar with its use, can accomplish more and better washing with this soap in the same time than two women with two of the best machines, using the ordinary soaps in the market. 3d. The clothes require no bluing, as they are beached every time they are washed, if they

are dried in the sun. 4th. It will wash out coach or machine grease paint or anything that can be removed, without the slightest injury to the garments. 5th. There is no acid or sai-soda used in its

manufacture. 6th. The proprietor guarantees that there is nothing in it that can in any way injure garments, if used as directed.

7th. It has a healing effect on skin diseases. such as washing tetter, etc. 8th. Clothing washed with this soap will last more than twice as long as with the ordinary soaps in uso.

9th. For washing paints, cleaning house, car pets, scouring, etc., it has no equal.
10th. By its use you save women, time, money, labor, clothes and fuel.

11th. A first premium was awarded by the

East Pennsylvania Montgomery County Agricultural and Mechanical Society, September 24th, 1869. Diploma preferred. 12th. To consumers it is the choapest soap

Patented March 22, 1870, by Alex. Warfield Thousands upon thousands are now using it, and will use no other, owing to the labor and time saved in washing, and the nice finish it gives to their clothing. Again, by using this soap, the annoyance of hot water in summer is avoided, and steam in the house during the winter, by which many severe colds are contracted, is prevented. For washing prints and woolens it has no equal. Manufactured by R. M. LATHAM, Alexandria, Va Buy it, try it, you'll not be without it, even

at double its cost. For sale at the principal stores in the city and county of Alexandria. FOR PRINTING! JOB PRINTING!
